A Council document

You are looking for a numbered Council document.

The prefix is optional, so if the document has no prefix the prefix field must be left empty.

The year is expressed as four digits.

Before 1979, prefixes were allocated for certain categories of documents. Placed before the document number in the form of a letter or abbreviation such as "C", "R", "RU", "S", "T", or "CECA", they give some information about the production conditions of the document (its distribution or subject).

Example:

Prefix (before 1979) : R  
Number            : 2956  
Year              : 1974

Note: Corrections, revisions, addenda and the like are considered suffixes. To simplify the search procedure, suffixes are not included in this search.
