Council conclusions - Annual Report 2015 to the European Council on EU Development Aid Targets

1. The Council welcomes the publication by the Commission of preliminary information on 2014 EU Official Development Assistance(ODA), analysing the trends with regard to EU collective and individual ODA commitments. The Council stresses that ODA is an important and catalytic element in the overall financing available for developing countries most in need.

2. On 17 June 2010 the European Council requested the Council to make an annual report on the EU and Member States' commitments and delivery on ODA. This is the fifth such report to be submitted to the European Council.
