<i>The political economy of the 2014-2020 Common Agricultural Policy: an imperfect storm</i> Johan Swinnen (ed.) 2015 	After five years of debates, consultations and negotiations, the European institutions reached an agreement in 2013 on the Common Agricultural Policy for the 2014-2020 period. The outcome has major implications for the EU's budget and farmers' incomes but also for Europe's environment, its contribution to global climate change and to food security in the EU and in the world. This book discusses this outcome and the factors that influenced the policy choices and decisions. It brings together contributions from leading academics from various disciplines and policy-makers, and key participants in the process from the European Commission and the European Parliament.	Monograph available at Legal Library and online Shelfmark SJUR AGRI 102780

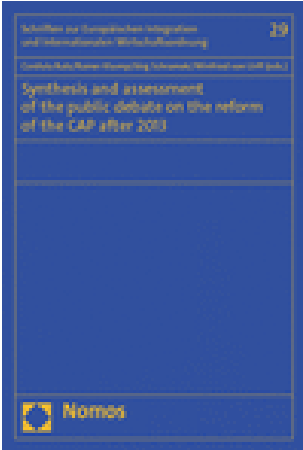

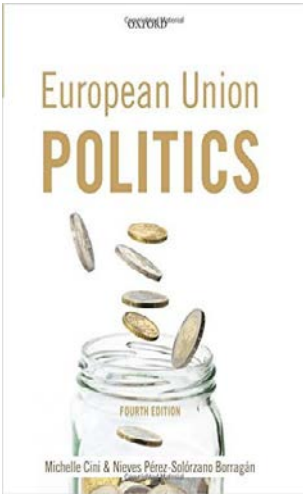

Title	Description/Preview	Availability
<i>The European Union and global engagement: institutions, policies and challenges</i> Normann Witzleb, Alfonso Martínez Arranz, Pascaline Winand (eds.) 2015 	Written by a broad range of international experts, The European Union and Global Engagement examines the current state of the European Union and its relationship with the world. The book presents fresh perspectives on the interplay between EU internal developments and its global engagement. <u>Chapter 5 is on 'The third era of the Common Agricultural Policy: parliamentary politics meet globalization'.</u>	Monograph available at Central Library Shelfmark 102691
<i>Extending experimental governance?: The European union and transnational regulation</i> Jonathan Zeitlin (ed.) 2015 	The book tackles the questions about the external dimension of EU experimentalist governance and its relationship to broader trends in transnational regulation through in-depth analysis of recent developments across a series of key policy domains by a distinguished interdisciplinary group of European and North American scholars. The domains addressed include neighbourhood policy, <u>food safety</u>, <u>GMOs</u>, chemicals, <u>forestry</u>, competition, finance, data privacy, disability rights, crisis management, justice, and security.	Monograph available at Legal Library Shelfmark 103118

<i>Access to the European Union : law, economics, policies</i> <i>Nicholas Moussis</i> 2015 	This book guides the reader through the maze of European Union policies. It throws light upon the European institutions, their raison d'être, their objectives and their experience, and explains EU measures, legal provisions and economic programmes. <u>Chapter 21 is dedicated to 'Agricultural Policy'.</u>	Monograph available at Legal Library Shelfmark SJUR DEUR 102959
<i>Politique agricole commune: analyse transversale de la conditionnalité environnementale</i> <i>Maxime Habran</i> 2015 	Pierre angulaire de la construction européenne, la politique agricole commune (PAC) est à l'origine mise en place dans le but d'assurer l'autosuffisance alimentaire de la Communauté européenne. Cette politique sera modifiée et réformée à de nombreuses reprises. D'une politique productiviste, elle devient attentive aux considérations environnementales, intégrant ces dernières dans chacune des réformes, allant même jusqu'à lier l'octroi de paiement au respect de règles essentiellement environnementales. Cet ouvrage présente la manière dont s'articule la relation entre les deux politiques autour de la notion de conditionnalité environnementale.	Monograph available at Legal Library Shelfmark 103140
<i>Global food security</i> <i>Isabel Teichmann</i> 2015	The challenges to global food security and their solutions reveal a interconnectedness of future developments in the agriculture and food sector with the provision of bioenergy and climate change. Moreover, consumer preferences and poverty play an important role. For this reason, progress towards global food security cannot be achieved only by the consideration of all possible solutions. Furthermore, the improvement of global food security is a responsibility of all countries, both developed and developing. Ultimately, the challenges to food security cannot be solved in isolation, but need to be tackled together with the fight against poverty and climate change.	Online article

<i>The economics of European integration</i> Miroslav N. Jovanović 2014 	Topics explored in detail include: EU budget, competition policy, <u>Common Agricultural Policy</u>, fiscal integration, monetary integration, industrial policy in manufacturing and services, trade policy and international economic cooperation, regional policy, social policy, mobility of labour, energy policy, transport policy, environment policy and enlargement.	Monograph available at Central Library Shelfmark 099186
<i>Analyser l'influence du syndicalisme agricole majoritaire: quelle utilité pour le modèle néo-corporatiste? Etude de cas à partir du "mini-paquet lait"</i> Guillaume Meynet 2014	This research aims to reflect on the role of interest groups in the political system of the EU based on the example of the dairy industry. The CAP is a special case since it ran from 1960 on a logic of co-management market policy between the Commission and the main European agricultural federation, the Committee of Professional agricultural Organisations (COPA) associated since 1962 to the General Committee for Agricultural Cooperation in the European Union (COGECA). However, because the process of CAP reform undertaken since 1992, it seems necessary to analyse whether the logic of co-management is being called into cause. This research concluded that there is a neo-corporatist report in the dairy sector, in the sense that a particular actor, the union COPA-COGECA managed to significantly influence the process by getting to strengthen the bargaining power of producers without reversing recent CAP reforms.	Online article
<i>High Nature Value farming throughout EU-27 and its financial support under the CAP</i> Clunie Keenleyside, Guy Beaufoy, Graham Tucker, Gwyn Jones 2014	High Nature Value (HNV) farming is a relatively new concept that describes the farming systems of greatest biodiversity value. This study is intended to contribute to the evidence base to inform the design of future EU policy for HNV farming.	Online article

<i>Innovative agriculture in the European Union: what are the new tools on offer</i> Petr Blížkovský 2014	This paper looks at the challenges for global good and how the EU can help its farming sector to cope with these challenges. The article aims at two objectives. First, to recognise and analyse the issues that are emerging concerning global food security. Parameters covered by the analysis include population, food consumption and production, climate change and trade. Second, to analyse the importance of R&D and provide an overview of how the new EU policy instruments for 2014-2020 can be used in the projected situation.	Online article
<i>Review of the balance of competences - agriculture: response from the Institute for European Environment Policy</i> Institute for European Environmental Policy 2014	This paper takes stock of the contribution by the Institute for European Environmental Policy, and considers what a possible UK renegotiation might mean for agriculture.	Online article
<i>Europe's forest strategy in the next decade: options for the Voluntary Partnership Agreements</i> Alison Hoare 2014	The world's forest sector has changed significantly in the last 10 years, with growing competition for forest lands and increasing restrictions on public finances. This has implications for moving forward with the EU's FLEGT VPAs (Voluntary Partnership Agreements). Further effort is needed to integrate VPAs into other policy agendas, in particular that of climate change, and to coordinate with broader trade policy.	Online article
<i>Community forestry in FLEGT Voluntary Partnership Agreements</i> Jade Saunders 2014	VPAs (Voluntary Partnership Agreements) are negotiated under the auspices of the 2003 EU Forest Law Enforcement, Governance and Trade (FLEGT) Action Plan. They are incorporating domestic political processes that have won plaudits from civil society for their inclusiveness, and a series of commitments to forest sector accountability and transparency on the part of governments. Countries currently expressing interest in VPAs are those with much less substantial timber trade relationships with the EU. This paper therefore seeks to elucidate one option for VPAs that could be of use to such countries.	Online article

<i>EU agricultural law</i> <i>Jens Hartig Danielsen</i> <i>2013</i> 	The Common Agricultural Policy is without question the most economically significant policy area in EU law, as well as the area in which Union regulation has been implemented most consistently and intensely. This book contends that today, considering this comprehensive regulation of issues that are of prime economic importance - and the rich case law that this EU policy has generated - EU agricultural law cannot be treated as an isolated discipline, but must be seen in the context of general Union law.	Monograph available at Legal Library Shelfmark SJUR AG 100008
<i>The EU regulation 1151/2012 on quality schemes for agricultural products and foodstuffs</i> <i>Matteo Gragnani</i> <i>2013</i>	Regulation (EU) No 1151/2012 on quality schemes for agricultural products and foodstuffs came into force on 3 January 2013, repealing and replacing Regulations (EC) Nos 509/2006 and 510/2006. It merges into a single legislative instrument the three complementary regimes of Geographical Indications (GIs or PDOs/PGIs), Traditional Specialities Guaranteed (TSGs) and the new Optional Quality Terms (OQTs). Moreover, the new Regulation establishes a unified legal structure designed to regulate certain general aspects common to GIs and TSGs (Title I and Title V) such as definitions, controls and procedures. This article analyzes the new legislation with a view of evaluating how it responds to the expectations and criticism that emerged during the reform process. The study is limited to the substantial innovations with the aim of assessing whether Regulation No 1151/2012 meets the proclaimed objectives and to determine where and how it could be improved in the near future.	Copy of the article can be provided by the Central Library
<i>La politique agricole commune face aux nouveaux défis planétaires et européens</i> <i>Claude Blumann</i> <i>2013</i>	Les pères fondateurs de la PAC, plus de cinquante ans après sa création, auraient quelque mal à reconnaître leur enfant. L'objectif était alors essentiellement d'accroître la production de façon à assurer l'autonomie alimentaire de l'Europe. Aujourd'hui les impératifs sont devenus environnementaux. L'Union est confrontée à des défis planétaires qui ont pour nom: lutte contre le changement climatique, garantie de la sécurité alimentaire et développement de biocarburants. PAC et politique de l'environnement conjuguent leurs efforts pour surmonter ces défis.	Copy of the article can be provided by the Central Library

<i>Synthesis and assessment of the public debate on the reform of the CAP after 2013</i> <i>Cordula Rutz, Jörg Schramek, Winfried von Urff</i> 2013 	The aim of this research project was to summarise and assess the public debate on the reform of the CAP after 2013 in ten EU member states following the publication of the European Commissions' Communication Regions entitled "The CAP towards 2020: Meeting the food, natural resources and territorial challenges of the future" (COM 2010 672 final) in November 2010.	Monograph available at Central Library Shelfmark 099308
<i>European Union politics</i> <i>Michelle Cini, Nieves Pérez-Solórzano Borragán (ed.)</i> 2013 	European Union Politics provides a comprehensive overview of EU theories, institutions, policies, and issues. <u>Chapter 23 is on 'The common agricultural policy'.</u>	Monograph available at Central Library Shelfmark 100066
<i>La comitologie est morte ! Vive la comitologie ! : Premières réflexions sur l'exécution du droit de l'Union après le Traité de Lisbonne : l'exemple de la Politique agricole commune</i> <i>Daniele Bianchi</i> 2012	Le Parlement européen et le Conseil avec l'adoption le 16 février 2011 du règlement (UE) n° 182/2011 relatif à l'exercice des compétences d'exécution par la Commission ont complété le cadre réglementaire destiné, après l'entrée en vigueur du Traité de Lisbonne à mettre en oeuvre les dispositions en matière d'exécution du droit de l'Union tels que prévues par les articles 290 et 291 TFUE. L'auteur en analyse le contenu, ses nouveautés par rapport à l'ancienne comitologie et se penchera sur son impact sur la PAC qui a été le principal utilisateur des procédures de comitologie depuis la naissance de cette pratique en son sein en 1960.	Copy of the article can be provided by the Central Library

<i>Constructing a policy-making state?: policy dynamics in the EU</i> Jeremy Richardson (ed.) 2012 	Constructing a Policy-Making State? sets out to examine the processes by which Europeanization takes place. <u>Chapter 5 is on 'Globalization and internal policy dynamics in the reform of the Common Agricultural Policy'.</u>	Monograph available at Central Library Shelfmark 100060
<i>The Common Agricultural Policy: policy dynamics in a changing context</i> Grace Skogstad and Amy Verdun (ed.) 2012 	The CAP has undergone policy reforms in the past two decades and these reforms have spawned a host of questions. What has caused the CAP to reform? How path-breaking are CAP reforms? Are they consistent with founding CAP goals or do they encompass new ideas about agriculture's place in the economy and society? And what are the consequences of agricultural policy reforms: for European farmers, consumers and taxpayers; for European 'public goods' such as environmental sustainability and preservation of rural communities and landscapes; and for third parties outside the EU, including the WTO?	Monograph available at Central Library Shelfmark 099272

<i>La Politique Agricole Commune (PAC) : précis de droit agricole européen - toute la PAC, rien d'autre que la PAC!</i> <i>Daniele Bianchi</i> <i>2012</i> 	La PAC expliquée dans tous ses détails: des centaines d'actes agricoles et d'arrêts de la Cour de Justice commentés et classés dans un cadre complet et systématique, accompagnés de références à la doctrine. L'ouvrage présente l'ensemble du droit agricole de l'Union européenne: du Traité de Rome, d'Amsterdam et de Lisbonne au droit dérivé le plus récent; du premier au deuxième pilier; de la politique de concurrence agricole à sa dimension internationale dans le cadre de l'Organisation mondiale du commerce; de la récente Organisation commune de marché unique au régime de paiement unique; de la réforme de la PAC de 2003 et du bilan de santé de 2008 au financement de la PAC, dans les perspectives de la PAC de l'après 2013. Le tout précédé par un excursus historique sur l'évolution de la PAC au fil des réformes et complété par un appendice consacré au droit agro-alimentaire européen.	Monograph available at Legal Library Shelfmark Legal Library SJUR AG 097028 / SJUR AG 097671
